# Family Engagement in Residential Programs

Residential Treatment Programs · https://bridges4mentalhealth.org/hub/residential-treatment-programs/family-engagement-in-residential-programs/

The purpose of this study was to convene key stakeholders across the United States to:

1) Learn how families are engaged in residential care across the country.

2) Understand barriers and facilitators to effective family engagement.

3) Define family engagement and the associated supports.

4) Develop recommendations on what family engagement needs to look like in residential care.

5) Advocate for recommendations generated by this project be adopted.
