ACEs: Adverse Childhood Experiences

Adoption Competent Mental Health · https://bridges4mentalhealth.org/hub/adoption-competence/aces-adverse-childhood-experiences/

Summary: This one-hour training will explore the formation and research of the adverse childhood experiences studies. Participants will learn about the ACE study as well as ways to take the research from knowledge to hands on application.

Application: Participants will be able to:

- Learn about the ACES research study
- Recognize verbal and nonverbal symptoms of ACE study scores
- Practice correlation of ACEs and resiliency.
