Integrated Care for Kids Model

Collaboration Between Systems and Coordination of Services · https://bridges4mentalhealth.org/hub/collaboration-between-systems-coordination-of-services/integrated-care-for-kids-model/

The Integrated Care for Kids (InCK) Model, developed by CMS, aims to improve care for children covered by Medicaid and CHIP by integrating health and social services through coordinated care and case management. The model focuses on early identification of health needs, reducing avoidable hospital stays and out-of-home placements by addressing both medical and social factors. It encourages states to implement Alternative Payment Models (APMs) to enhance care quality and outcomes for children.
