Safely Reducing the Use of Congregate Care: Considerations in the Age of Family First

Residential Treatment Programs · https://bridges4mentalhealth.org/hub/residential-treatment-programs/safely-reducing-the-use-of-congregate-care-considerations-in-the-age-of-family-first/

This webinar explores provisions of the Family First Prevention Services Act relating to reducing the use of congregate care and strategies to reduce reliance on congregate care. Most importantly, it includes examples from agencies that have successfully reduced the number of children in group care. Presenters from Connecticut and Oklahoma child welfare agencies share strategies used to increase the number of children who safely remain with their own families or in the least restrictive, most family-like setting.
