

CONNECTICUT IS A NATIONAL LEADER IN ADDRESSING CHILDHOOD TRAUMA

HOW FAR WE'VE COME

WHERE WE'RE GOING

IDENTIFYING THOSE WHO NEED HELP

More than **20,000 CHILDREN**

have been screened for trauma exposure in behavioral health, child welfare, and juvenile justice, education and pediatric health settings since 2014

Developed the brief Child Trauma Screen, a 10-item measure that identifies youth suffering from trauma exposure

BUILDING A TRAUMA INFORMED WORKFORCE

Professionals Trained in Statewide Initiatives on Childhood Trauma (2007-2017)

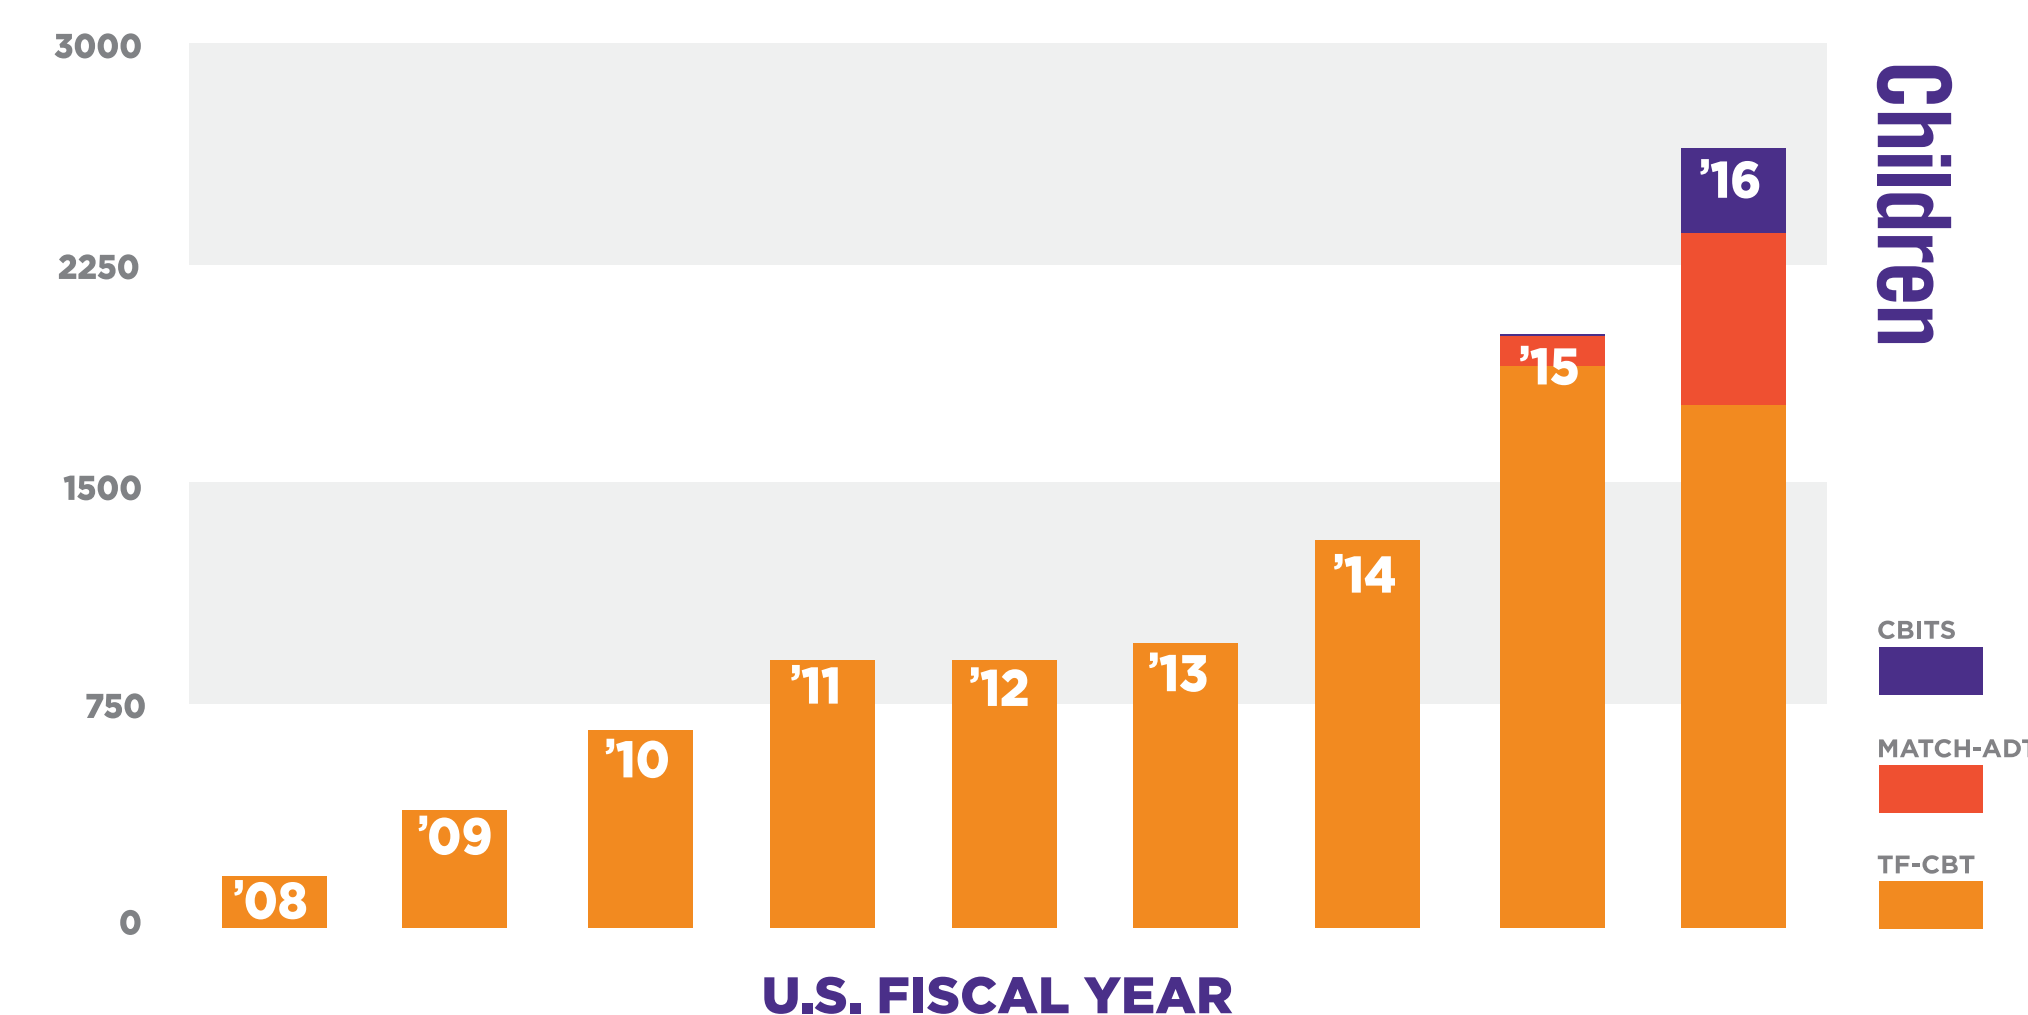

ACCESS TO EFFECTIVE TREATMENT

Since 2008, more than

10,000 CHILDREN

Have received evidence-based treatment for trauma

PTSD RECOVERY & REMISSION

80% of children completing TF-CBT showed likely remission of PTSD diagnosis

Lifetime cost savings estimated at **\$6,550** per child receiving TF-CBT

EARLY CHILDHOOD TRAUMA COLLABORATIVE

Addressing the gaps in care for young children

BIRTH TO 6 YEARS OLD

Children Receiving Evidence-Based Treatment in CT by Age Groups

Over the next 5 years an estimated **13,000** additional children will receive an evidence-based trauma treatment including **2,000+** children under age 7. And more than **700** early childhood providers will be trained in trauma, through ECTC Early Childhood Trauma Collaborative
